Re: Promoting Interoperability in the 700 MHz Commercial Spectrum, WT Docket No. 12-69

Dear Ms. Dortch:

On Friday, August 24, Joan Marsh, Gary Phillips, and the undersigned from AT&T Services, Inc., along with David Lawson and Mark Schneider from Sidley Austin, LLP, met with Jessica Almond, Nese Guendelsberger, Maria Kirby, Jim Schlichting, and Melissa Tye, of the FCC's Wireless Bureau to discuss the above-referenced matter.

During the meeting, AT&T reiterated its position that interference from high powered broadcast TV signals from Channel 51 is the most significant impediment to use of the 700 MHz A block, and that the Commission would best address the issues raised in this proceeding, consistent with the public interest, by facilitating the voluntary relocation of high powered broadcast TV Channel 51 stations. The attached deck was used as the basis for AT&T's presentation.

Pursuant to Section 1.1206(b) of the Commission's rules, I am filing this notice electronically in the above-referenced dockets. Please contact me directly with any questions.

Sincerely,

/s/ Joseph P. Marx
Assistant Vice President, AT&T Services Inc.
